# WHAT IS EDC?

- **Enviroseal Dust Control™ (EDC) is a free flowing liquid composed of agrarian fatty acids reacted with glycols to form a high molecular weight organic polyester which is modified with hydrophobic and hydrophilic wetting agents causing it upon application to wet and penetrate fine grained soils and transform them into a dust free surface that is not eroded by inclement weather conditions or heavy traffic.**

# FEATURES

- **Supplied Ready to Use-No water needed**
- **Non-toxic, Non-Hazardous**
- **Environmentally Safe, Biodegradable**
- **Proprietary Formulation**
- **Can be Custom Formulated**
- **Will Last Six to Twelve Months**
- **Works Longer Than Anything Else Available**

# **EDC is Effective For**

- **Solar Generation Farms**
- **Helicopter Landing Pads**
- **Military Field Operations**
- **Running Tracks**
- **Golf Cart Paths**
- **Open Fields**
- **Dirt/Unpaved Roads**
- **Active Construction Projects**

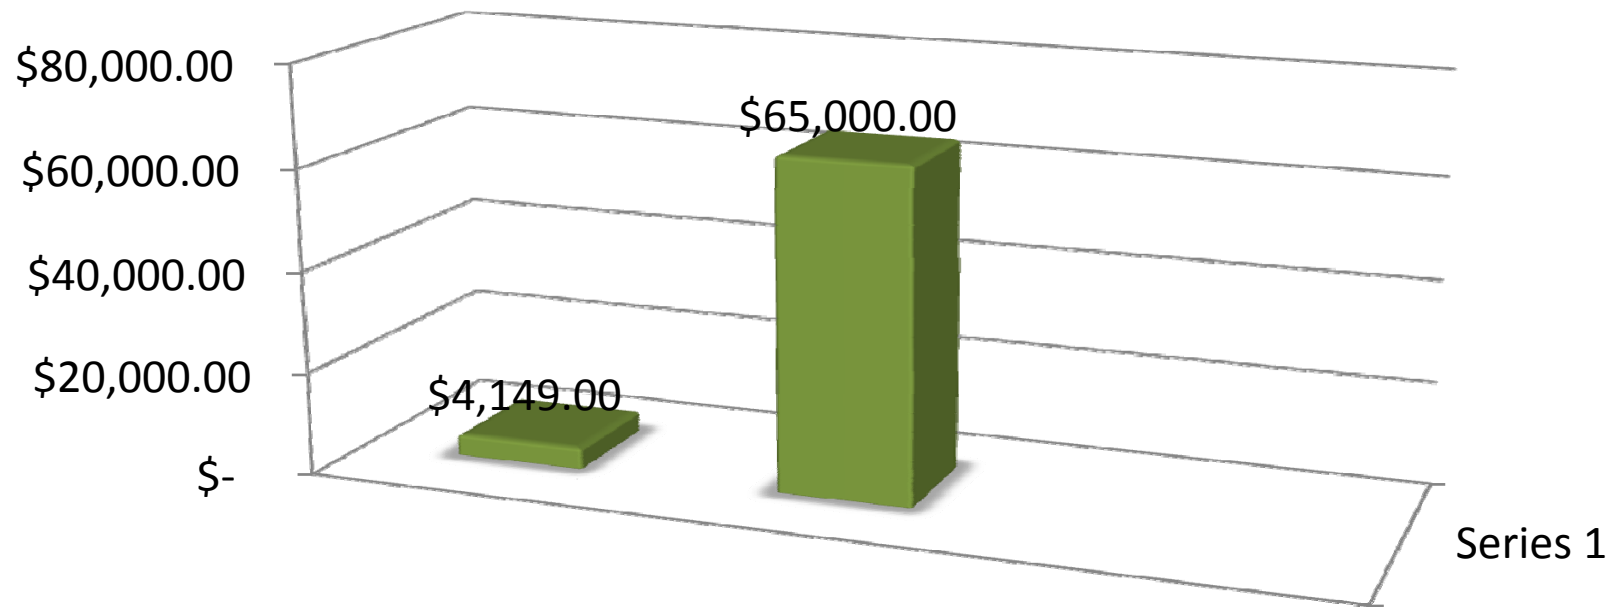

# Suggested Dosage Rates

<b>Application Type</b>	<b>FT<sup>2</sup>/Gal</b>	<b>M<sup>2</sup>/L</b>
<b>Normal Conditions</b>	<b>110</b>	<b>2.7</b>
<b>Heavy Conditions</b>	<b>85</b>	<b>2</b>

Application rates may vary due to soil type and other factors like moisture, UV, and heavy traffic

# Cost of EDC

\$ Per Year

Estimated Annual Costs Between Weekly Operation of a Water Truck Compared To One application of EDC per Surface Acre

# Shipping Methods

**\*55-gallon Drums**

**\*1,000 Liter (264-gallon) Disposable Totes**

**\*Bulk Truck**

**\*Bulk Rail**
