

Now Presenting

What is *Roof-Guard 102™*

Roof-Guard 102™ is a high quality acrylic formulation that is applied to either new or old clay and cement tile roofs. Roof-Guard 102™ will protect your roof against Algae. It is a clear non-toxic sealer that is impregnated with specially formulated biocides that will extend the life of your roof for years. Roof-Guard 101™ and 102™ are specifically designed to attach and penetrate itself to the cementitious materials which make up your roof

Roof algae is technically referred to as

How does it Work?

Gloeocapsa Magma", an airborne strain that is spread from one roof surface to another by wind. These algae will discolor the surface and absorb solar heat. The results are premature failure in composition surfaces and of course unsightly appearances. Gloeocapsa Magma thrives on limestone and all lime based products like cement. This algae can be prevented from growing on roofs by using Roof-Guard 102™. Even your new roof is being degraded by the UV damage. This is where Roof-Guard 102™ will protect your investment.

Enviroseal Corporation stands behind our 100% warranty on your Roof-Guard

What is the Warranty?

102™ treatment for (7) seven years against algae and tile erosion We do not warrant against wind uplift although laboratory testing has proven increases in excess of 215%. Test results are available upon request.

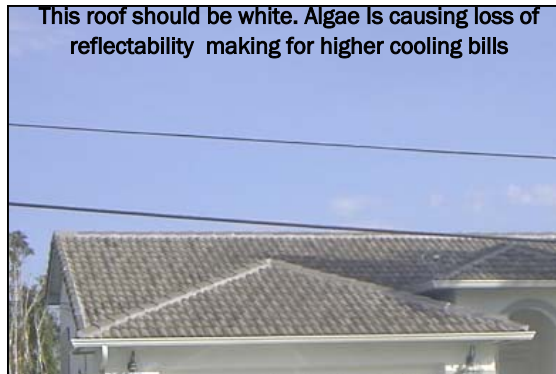

ROOF - GUARD 102™

Has been specifically formulated for concrete and barrel tile roofs. Roof-Guard 102 actually penetrates the surface and prevents the algae from growing. Thus keeping your tile roofs clean like new while strengthening the structure of the tile. No more pressure washing, or roof damage from people walking on your roof. No more tiles getting weakened by the Gloeocapsa Magma algae from eating the lime base to your tiles. They will stay strong, clean, and like new for years to come. Testing on roofs that have withstood Florida's climate is ongoing for over 7 years. Roof-Guard 102™ is **Guaranteed** to keep your tile roof looking new for a minimum of (7) seven years.

Tile roof damaged by 100 mph winds

This roof should be white. Algae is causing loss of reflectability making for higher cooling bills

Barrel Tile Treated with
Roof-Guard 102™

Note the Sheen / Glazing Effect

Environmentally friendly

will not harm your plants
